PERSONAL STATEMENT

I have been working in web development since 2023, during which time I've developed projects and provided support that impacts over **50,000 users** across my city. My role as a **Full Stack** developer has primarily involved using **AngularJS** and **Java** with **Spring Boot** framework. Additionally, I am experienced in writing unit tests for both technologies. Within my team, I've taken the initiative to implement **unit tests** and integrate several projects with **Docker**, **Jenkins** and **GitLab** for **CI/CD**, aiming to enhance our workflow and overall development experience. I'm also used to working with **SOLID** concepts, **clean architecture** and **clean code**. I also have been studying FP with [Elixir](#).

WORK EXPERIENCE

FullStack Developer

At [Cast Group](#)

May. 2023 - Present

As a Full Stack Developer at Cast Group, I play a crucial role within the AGETEC team, utilizing my expertise in AngularJS and Spring Boot with Java 17. I also try to engage my colleagues to create unit tests and to make code reviews. Additionally, I've contributed to the development of new features and the resolution of bugs in over 10+ legacy projects using Java 6 and Jersey.

- My responsibilities encompass the entire development lifecycle, from maintaining legacy systems to creation of innovative solutions. I've closely collaborated with the product team and stakeholders, playing a pivotal role in the development of new features and bug fixes for projects serving over 50,000 active users.
- Furthermore, I proposed to the company the migration of a project from Java 6 and Jersey to an MVC architecture utilizing the Spring Boot framework. I took charge of overseeing this migration effort, collaborating with a junior developer throughout the process.
- In another project, I focused on integrating internal APIs to develop a management interface for a project named "Panic Button." This initiative aimed to assist public school teachers in quickly requesting assistance during emergency situations within schools.

IT Support Analyst N2

At [Sistema Locar](#)

Jun. 2022 - Apr. 2023

I worked assisting users of our system with day-to-day issues, addressing inquiries, and providing remote access to resolve any setbacks. Additionally, I am involved in sales, presenting the system to new clients, maintenance, and training. I have learned the ins and outs of the entire process, from customer contact to implementation and maintenance. I also assist with certain issues in the PostgreSQL database and handle programming customizations in Delphi 7, the platform on which the system was originally developed.

EDUCATION

Bachelor of Computer Science

[UNIDERP](#)

Jan. 2022 - Dec. 2025
